

# DVBBS, Angel (ft. Dante Leon)

I found an angel from outer space  
I found an angel from outer space  
We feel the same about a lot of things  
She wouldn't change for the milky way

Her love is so new age  
She's got a flicker in her eyes, make you feel alive  
I wake up high, cross my heart, and girl I hope to fly  
Like everyday we fly away baby you know you blow my mind

My, girl you blow my mind  
I found an angel from outer space  
We feel the same 'bout a lot of things  
She wouldn't change for the milky way

Her love is so new age  
I found an angel from outer space  
An angel from outer space, an angel from outer space  
I found an angel from outer space  
An angel from outer space

I found an angel from outer space  
I found an angel from outer space

I found an angel from outer space  
We were flying higher than balloons  
Taking off and shoot me to the moon
