

# Dystopia, Green Destroyed

with all the flaws of technology  
we are forced to destroy  
to keep with our "needs";  
but our needs are superficial cause the best things in life are the things that are free  
solar energy is perfect  
it's abundant and free  
but they cannot sell the sun  
so they pollute the air we breathe  
if there's gas burning over that then there's money to be made  
it doesn't matter if we choke  
just as long as they're paid  
humanity is diggin its own grave  
from the master in his high rise  
to his hunched over slaves  
we are all to blame  
we're all wasteful and greedy  
your own ways  
examine your actions..retrace your steps  
the oblivious fool is the fool who breeds death  
you cannot attack the whole until you kill the fool inside  
so much can be done  
but you must first use your mind  
you'll never be perfect unless you drop out of life  
you're cavity just the same  
we must realize we're either making things worse or helping things change  
there is no better place  
save the earth  
why all die in misery  
break your chains  
we can't change in our graves  
save the earth  
and we're damned to count on you  
break the chains
