

# E-Type, Angels Country

I've got all systems go nothing standing in my way  
I should be far down the road but I'm not  
Something's holding me back like a wild horse attack  
and I've got you by my side but you're not  
Do you remember when we thought there was no end  
a shooting star around the sky  
Do you remember when you were from heaven sent  
how far the wind could make me fly  
Angels crying, when you're far away from me  
Always trying, I will make you see  
Angels crying, when you're far away from me  
No denying, we were meant to be  
I tumbled from the sky where I was soaring so high  
Never thought that I could fall back down to the ground  
Somewhere along the ride I found  
that we can't stop the tide  
it is time for me to buy another round  
Do you remember when we thought there was no end  
a shooting star around the sky  
Do you remember when you were from heaven sent  
how far the wind could make me fly  
Angels crying, when you're far away from me  
Always trying, I will make you see  
Angels crying, when you're far away from me  
No denying, we were meant to be
