

# Earl Thomas Conley, Silent Treatment

You proved to me that I don't need  
To be all by myself to feel alone,  
But lately conversation only comes  
When someone's calling on the phone,  
Oh, but I'm not asking questions  
Afraid that I might find out  
What's really wrong

You give me that silent treatment  
I can take it or leave  
I'm getting that silent treatment  
And it's working on me

Oh, but leaving off all the changes  
I remember back when our love  
It didn't hurt  
Like when I'd wake up close beside you,  
And you'd just lay there begging me  
Stay home from work,  
Now you don't like to talk about it  
But lately we've been missing  
More than words

I'm getting that silent treatment  
I can take it or leave  
You give me that silent treatment  
And it's working on me  
On me, on me, you got it working  
Working on me
