

Earth, Wind & Fire, The Speed Of Love

Maurice White, Wayne Vaughn, Wanda Vaughn & Tony Haynes

You can't stop me
I was born to be with you
Your love's my center point of view, every day
You can't stop me
Gonna stand right next to you
Until I know that I was made for you

Let me bet you, I'll never come in second place
I know I got what it takes for you
Hey love -- moving at the speed of love
Love -- livin' with the need of love
Hey love -- burnin' in the heat of love
I need your power in the midnight hour

The best is yet to come
Once you're in my arms
Let me take control at the speed of love

If you let it
Love will be your stepping stone
One that I'm depending on, to shine
And that's the bottom line
Love is magic
Created in a special place
Moving in and out of space for you
Let love take us
To a land of pearly skies
A wonderland that never dies

Hey love -- moving at the speed of love
Love -- livin' with the need of love
Hey love -- burnin' in the heat of love
I need your power in the midnight hour

Let's take circumstance
By design or chance
Makes no difference at the speed of love

Emotions won't slow down
Hearts are upward bound
Passing lights and sound at the speed of love
