Eberhard Schoener, Speech Behind Speech

Speech behind speech
That teaches itself under the touch and sight
In the night-bound city
Uncovers spaces where no spaces were before

Language of light
Uncovers spaces where no spaces were
Between the image of it and your face

Language of silence
Surface and see and touch
My name was left (?, maybe "expected")

Speech behind speech
That teaches itself under the touch and sight
In the night-bound city

Language of light
Uncovers spaces where no spaces were
Between the image of it and your face

Language of silence
Surface and see and touch
My name was left (?, maybe "expected")
