

Eddie From Ohio, And The Rain Crashed Down

Nine lives, we had them once
Used them up too fast, we will always be together
Nine miles to Cooperstown, famous words come last
I will love you forever

(chorus)

And the rain crashed down on the roof
For punishing our transgressions, waiting on a confession
And the rain crashed down on the roof
Said didn't you see it coming, when you hit the ground running away, away, away

Ten times if you told me once, you better watch your mouth
Some things better left unspoken
Ten signs to be if only we got singled out
Only the silence was unbroken

(chorus)

Well the days were warm but the nights were long and we were just getting by
It took me every minute just to find you
Well the days were warm but the nights were long and we were just getting by
Do I need to remind you
Do I need to remind you

You say you won't forget, well mark it with a star
Honey this race ain't for the winning
Here's where to find me now if home is where you are
I'll be soaking wet and grinning

(chorus)
