

Eddy Arnold, I Get Baby On My Mind

There in the glow of early dawn
I wake to find that I'm alone
And turn off the alarm clock she always used to wind
And that's when I get baby on my mind

I make instant coffee just for one
I scrape off the toast that's over done
Then I sit there pretending I'll get along just fine
And that's when I get baby on my mind

And all through the day each hour I'm away
No matter what I do I always find

Although we may be far apart
I still got baby in my heart
There's too many mem'ries she left behind
And that's when I get baby on my mind
