## Edenbrigde, Starlight Reverie

facing the constellations high above the sky if I could fly along and sway the milky way when venus has its row, great bear and polar star I see them dimming from afar, is's so bizarre [pre-chorus] starry sky so come by forgotten traces so nigh your beauty repeals the laws of time [chorus] my stralight reverie in my sparkling eyes just take me through the grand bright moonlight night your eyes can only see what your heart truely feels then it is time to turn and flee into my starlight reverie see tails of comets glowing in the outer sphere red giants in their spectral light, tonight the solar system of orion there appears lightyears away from mother earth, a star's birth [pre-chorus] [chorus] [bridge]
