

# Eidolon, Lunar Mission

T minus 30 brings our focus into sight  
The realization of a dream  
Serene landscapes now engulfed by clouds of white  
By flames of hope we launch to unsuspecting skies

Lunar mission  
To find a new existence

Above the clouds we soar  
Our mission holds no use for strife  
Our faithful quest - in search of life  
View a venera probe  
Our destination now in sight  
Is there existence  
Beneath the stars eternal light

Lunar mission  
To find a new beginning

Lunar mission  
To find a new existence  
Lunar mission  
To find a new beginning
