

Ellie Goulding, By The End Of The Night

Wide awake, in the midnight sun
Elevate You're the brand new drug
I wanna taste
Wanna dry my tears they disappear when I'm with you

Feel like the summer
Saturday upper
I want you
Don't make me wait... take me away

By the end of the night
I wanna feel like the sky is dripping
On every part of me
And by the end of the night
I wanna look at the light chasing the shape of you next to me
And by the end of the night
I wanna be the only one in the world
When I look in your eyes
I see you mine
By the end of the night

Is it love
Call it chemicals... the way you touch... so unforgettable
Feel the rush
I don't wanna sleep with fever dreams when I'm with you

Feel like the summer
Saturday upper
I want you
Don't make me wait... take me away

By the end of the night
I wanna feel like the sky is dripping
On every part of me
And by the end of the night
I wanna look at the light chasing the shape of you next to me
And by the end of the night
I wanna be the only one in the world
When I look in your eyes
I see you mine
By the end of the night

By the end of the night
By the end of the night

Two hearts running wild and free
By the end of the night
Two hearts just falling too deep

Feel like the summer
Saturday upper
I want you
Don't make me wait... take me away

By the end of the night
I wanna feel like the sky is dripping
On every part of me
And by the end of the night
I wanna look at the light chasing the shape of you next to me
And by the end of the night
I wanna be the only one in the world
When I look in your eyes
I see you mine
By the end of the night
