

Elliott Smith, Bottle Up And Explode! (Early Version)

Bottle up and explode over and over
Because you react slower than slow
Put it away, check out for the day
In for a round of overexposure
The things Mother Nature provides
To get up and go
Bottle up and explode
Seeing stars surrounding you
Red, white, and blue
She looks at him like he's never known her
It's only been a year and a half
Thinking that that was a matter of fact
Thinking that he was about to come over
I've been standing up, waiting for you
You never showed
Bottle up and explode all the outside signs of you
Red, white, and blue
Bottle up and explode all the outside signs of you
Red, white, and blue
