

# Elton John, Satellite

Well you come on like a comet, ideas in your head  
Starving for affection, waiting to be fed

Crazy like a full moon, eyes open wide  
Taking in everything you need to stay alive

Who leads who, who knows where  
If you leave me now will I see you again

I'm telling you love bites  
Like a satellite  
Going round and round  
It's something, something you can't fight  
Oh in the daylight  
And even in the dark night  
I want you to surround me  
Surround me like a satellite

Oh you move like a shadow of your own design  
Do you want to trap me in between the lines

I don't walk on water if you think I can  
If you want a miracle call up a Superman

Are we there  
Is this love  
Is this a space race  
That we're both part of
