

# Elton John, Shine On Through

Oh my love  
I have cursed the stars above  
That lead my heart to you  
But as hard as I try  
Still my love will not die  
And the stars still shine on through  
And the stars still shine on through

Oh my dear  
Now this ship's too hard to steer  
The tide has turned, turned on you  
I have been through the lies  
That I've seen in your eyes  
But the truth still shines on through  
But the truth it still shines, shines on through

So shine, shine on through the days we have to fill  
Though we took our love so daringly  
And gave it up uncaringly  
There are feelings left not even we can kill

Oh my friend  
So at last we reach the end  
The lights go down on cue  
I have wasted my time  
But it tasted oh so fine  
That my love still shines, shines on through  
And my love still shines, shines on you
