

# Elton John, Shooting Star

I'm still in love with you oh shooting star  
And when I start to wonder where you are  
There you are, there you are, shooting star

You may have seen me at the early show  
I sat and watched you from the second row  
Oh you were mine long ago way back when  
Even then we both knew you'd go far oh shooting star

And with the spotlight shining in your eyes  
It's sometimes hard to find your way  
But maybe some night you might  
Think of me, shooting star

And when that moment comes at last  
And you remember who you are  
Here I'll be, shooting star, shooting star  
Here I'll be, shooting star, shooting star, shooting star
