Elton John, Spotlight

Night life, hot spot light I've gotta make them dance tonight Night life, hot spot light I really want to shine tonight Night life, hot spot light I gotta steal a heart tonight Night life, hot spot light I'll show them how to dance tonight

I know that the competition's heavy I know that these guys are cool But I'll show this kid is more than ready I sure got something to prove

Right now I'm just another guy I don't mean nothing to them but when they see me dance When they see me dance

Right now the music's moving higher I feel them stepping up the beat These shoes will set the floor on fire Everybody on your feet

You thought that you'd seen the best Well I can tell you, forget the rest When you see me dance When you see me dance
