

Elvis Costello, The Greatest Love

(Toussaint)

The greatest love I ever loved
Was the love I had for you
The greatest wish I ever wished
Was when I wished that you love me too

But I found out that you were lying
When you said that you'd be mine
All that talk about break up, never, leave me never
It was the greatest love
It was the greatest love
But I still love you
I still love you

The greatest hurt I ever hurt
Was the hurt you put on me
It took so long to find out
That this love could never be

But I found out that you were lying
When you told me you'd be mine
All that talk about break up, never, leave me never
It was the greatest love
We had the greatest love
But I still love you
I still love you

Well I found out that you were lying
When you said that you'd be mine
All that talk about break up, never, leave me never
It was the greatest love
We had the greatest love
But I still love you
I still love you

(Greatest love)
I still love you
(Greatest love)
We had the greatest love
(Greatest love)
I still love you
