Elvis Presley, This Is Our Dance

We had a real good evening Now all our friends are leaving Soon we'll be alone Wait till everybody has gone Then play just one more song

'cause this is our dance Darling remember, it's our dance Loving and tender I'll take you away, take you away In my arms Yes this is our dance, now we're together For our dance can't last forever And nobody knows just what tomorrow will bring So let our dance begin

We'll turn the light down low now I'll never let you go now You're here in my arms And when I hear you whisper you're mine We'll play that song just one more time

'cause this is our dance Darling remember, it's our dance Loving and tender I'll take you away, take you away In my arms Yes this is our dance, now we're together For our dance can't last forever And nobody knows just what tomorrow will bring So let our dance begin
