Embodyment, K-9

hold this sanity within your hands demons tease and migrate, soar on wings but you my guardian angel pull me through

stay, darling giving up, giving in, kiss your lover

nylon barricades and window soul red cross meetings daily ground this root clever thoughts like you and me make us

stay, darling giving up, giving in, kiss your lover

stay I'll find you home be not far from me

roll the stone, the sun has brought the day cradle nothing in the arms of peace

break time, lather, ointments aren't healing
