

# Embrace, You Have Only Got To Stop To Get Be

With every single step I take I'm leaving  
Will you get your story told  
Stealing light from fallen stars  
The devil that you know knows where you are  
Sell your soul, you'll go far

You've only got to stop to make it easy  
We were born without the brakes  
What we like we say we like  
Like what you should hate and make your name

If I seem down then look again

You've got to stop to make it better  
And you don't feel it so you'll do it again

I don't need your labels  
You can use what's in my name

If I seem down then look again

When only stopping gets you better  
And you don't feel it so you'll do it again  
I don't need your labels  
You can use what's in my name

If I seem down then look again

Look again  
Look again  
Look again
