

Emeli Sandé, Sparrow

I got wind beneath my wings
I think this time I'm gonna make it 'til morning
I got strength within my heart
I'm gonna sing for all the heroes who've fallen

I'm gonna take the long, the long way home
Yes, I'm gonna take the world, the world by storm

we got magic in our bones
just like the stars
were gonna shine bright and golden
we go bang down all the doors
make sure we take back all the things that were stolen

We're gonna take the long, the long way home
Yes, I'm gonna take the world, the world by storm

see - with me the heart of a sparrow
tell me what arrow could ever bring you down
the escape – it was narrow
but what a gift - the courage you found
see - with me the heart of a sparrow
tell me what arrow could ever bring you down
the escape – it was narrow
but what a gift - the courage you found

I got a stars within my soul
I think the dust the end is gonna finally settle
but hurry
pure as rivers
strong as mountains
we spread love like the flowers give petals

We're gonna take the long, the long way home
Yes, I'm gonna take the world, the world by storm
We're gonna take. take the long way home
That's right!
than we're gonna take the world,, the world by the storm!

yes, we're gonna take the whole wide world by the storm!
