

Emilio Navaira, I Think We're On To Something

Thought I knew everything that a kiss could be
Had no clue it could do all of this to me
Ain't it fine every time that we get together
It just gets better and better

Chorus:

I think we're on to something
I think we both know
Which way our luck is running
Where it's gonna go let's just let it roll
I think we're getting warmer
Like a rising sun
On a bright blue morning
The best is yet to come
It's come down to love
I think we're on to something

Every time I go to call you
My phone starts ringing
Then we say everything that the other's thinking
And for once I think love has a future in it
Hey baby wait a minute

Chorus

It's come down to love
Hey baby wait a minute
I think we're getting warmer
Like a rising sun
On a bright blue morning
The best is yet to come
It's come down to love
I think we're on to something

I think we're on to something, baby yeah
I think we're on to something
I think we're on to something
