Emily Osment, Shoebox

I kept your picture in my shoebox [3x] Right now is all we need 'Cuz this feels pretty good And I would stop the world Just to give us more time I kept your photograph and sometimes I take a look Do you think I should Are you gonna leave (Is she a better girl) And does she know about me

Hey you, I think you're going in the wrong direction Hey you, I could be everything you want And it's true, You must have been something special to me 'Cuz after all this time I kept your picture in my shoebox

Tonight was you and me And it felt pretty good Just like we stopped the world For a minute in time And then you made me laugh About all the things we did Do you think we should Did you have to leave (And the other girl) Does she know about me

Hey you, I think you're going in the wrong direction Hey you, I could be everything you want And it's true, You must have been something special to me 'Cuz after all this time I kept your picture in my shoebox

I hear you talk but your mouth is closed You say the words and let me know I can't speak I'm petrified Wanna tell you what I feel inside I kept your picture in my shoebox [2x]

Hey you, I think you're going in the wrong direction Hey you, I could be everything you want And it's true, You must have been something special to me 'Cuz after all this time I kept your picture in my shoebox I think you're going in the wrong direction I could be everything you want And it's true You must have been something special to me 'Cuz after all this time I kept your picture in my shoebox I kept your picture in my shoebox
