

Endo, Leave Us Alone

first things first let the mindset flow
leave us alone
it's not what you think
animals let down like the cannibals
leave us alone
it's not what you think
the fire
big guns are for hire
fuck what you say, we do what we feel
pickin' it up off the down low
making sure systems go
breakin' it off with the endo
i drop the bomb and the bomb set go
leave us alone
