

Endo, Save Us

one nation full of fear
temptation way too strong
you scream without a tear
there's something wrong
in here
save us
we're here
save us
i ask before the free
why freedom kills the brave
a false reality
leaves me enslaved
in here
save us
we're here
save us
want to believe you want to try
freedom's within don't let yourself die
there's something wrong
