

Engelina, Talk To Me

When I'm here for you won't you show me through
This silence can't go on
You don't have to turn away and leave me alone
When I'm here for you won't you show me through
This silence can't go on
You don't have to turn away and leave me alone

Speak to me
I have to understand
What's going on
Do you feel the same
Tell me don't wait till the morning breaks
I need to know
I need to know

When I'm here for you won't you show me through
This silence can't go on

You don't have to turn away and leave me alone
When I'm here for you won't you show me through
This silence can't go on
You don't have to turn away and leave me alone

When I'm here for you won't you show me through
This silence can't go on
You don't have to turn away and leave me alone
When I'm here for you won't you show me through
This silence can't go on
You don't have to turn away and leave me alone

And leave me alone
When I'm here for you won't you show me through
This silence can't go on
You don't have to turn away and leave me alone
