England Dan & John Ford Coley, Gone Too Far

How it all started, I hardly remember A casual walk through the park in the winter All that I wanted was someone I could talk to It had to be you.

The wind was cold we hudled together Looking bake I should have known better Wasn't it me who said I'll never fall for anyone And look what I've done.

Chorus:

Gone too far, I don't know how I did it Gone too far and I hate to admit it But I spend all my time thinking of you Gone too far, there's nothing I can do now Gone too far, it'll work out somehow But I spend all my time thinking of you

Seems before, I didn't know what was missing Maybe I did, but I just wouldn't listen Wasn't it me who said I'll never fall for anyone And look What I've done.

Repeat 1st 3 lines of chorus Adlib

Bridge:

Maybe somewhere along the line I knew it would happen to me Now I look in those smiling eyes And for days now that's all I can see
