

# Equinox Ov The Gods, Plaguebringer

Black blood. Dust and ashes.  
In the spiders web the fly is lost  
Dead eyes in darkness prying  
Within my corpse the worms still crawl

Bleached bones 'round my throne lie scattered  
Where life once bloomed now silence rule  
Faceless A dark god now risen  
To purge the earth, to thin the heard  
Brought to life in silence  
Out of worm infested graves  
In darkness I've risen  
To curse the world again

The Earth is dead...

The black wounds never healing  
Welcome death, I've come to you  
The hellish pain increasing  
My legacy I've brought to you

Brought to life in silence  
Out of worm infested graves  
In darkness I've risen  
To curse the world again

Plaguebringer  
The Earth is dead...
