

Erasure, Love Me All Night Long

Before it all gets written down
You've got to re-arrange to create your own illusion of truth
Know that it's good and it's real
Before it all gets written down

You don't have to face the future alone
Everybody has to deal with a tricky situation
Know that it's good and it's real
Before it all gets written down

Love me that's all you have to do
All night long
Show me it's all you have to be
To make it right

You've got your head high up in the clouds
Know you really got to be a down to earth person
Know that it's good and it's real
Before it all gets written down

You don't have to face the future alone
Everybody has to deal with a tricky situation
Know that it's good and it's real
Before it all starts getting you down

Love me that's all you have to do
All night long
Show me it's all you have to be
To make it right
Love me that's all you have to do
All night long
Show me it's all you have to be
To make it right

You've got your head high up in the clouds
But you really got to be a down to earth person
Know that it's good and it's real
Before it all starts getting you down

Love me that's all you have to do
All night long
Show me it's all you have to be
To make it right
Love me that's all you have to do
All night long
Show me it's all you have to be
