

Erasure, Save Me Darling

Why should it matter how i feel?
This old romantic down at heel
Then again if i'd known the outcome sure you'd win
Illusion shattered made them real
A night of magic fate is sealed
ran a mock, and you knocked my tiny world for six

It wouldn't have made the slightest blindest bit of difference
All together now let's hear you pray
Make it better now and savour the day
I'm all over save me darling

I feel it deep down deep inside
can-not believe we're still alive
that is good coz I did not mean you harm my love
We took a shot at masquerade
Came crashing down on love's parade
We were young, where so full of teen emotion then

We couldn't have made the slightest blindest bit of difference
All together now let's hear you pray
Make it better now and savour the day
I'm all over save me darling

All together now let's hear you pray
Make it better now and savour the day
I'm all over save me darling

We couldn't have made the slightest blindest bit of difference
All together now let's hear you pray
Make it better now and savour the day
I'm all over save me darling

All together now let's hear you pray
Make it better now and savour the day
I'm all over save me darling

We couldn't have made the slightest blindest bit of difference
I'm all over save me darling

All together now let's see you pray
Make it better now and savour the day
I'm all over save me darling

All together now let's see you pray
Make it better now and savour the day
I'm all over save me darling
