

Erik Segerstedt, How Did We Change

We're running in circles
And we're running out of breath
A war of the roses
That's how bad it gets
See the heart of the matter is
That this house just ain't a home
Used to hold so much warm heartedness
That it's gone
How did we change?
How did it get this far?
How did we change?
Remind me just who we are
Cause I miss the both of us
Making love the way it was
How did we change?
How did we change?
From something to nothing
Isn't strange
That love made us strangers
What put out the flame?
See I don't know what we're
Missing, or how to make a difference
But I'm willing to try
I miss the both of us
Making love the way it was
How did we change?
How did it get this far?
How did we change?
Remind me just who we are
Cause I miss the both of us
Making love the way it was
I miss the both of us
So damn much
So damn much
How did we change?
How did it get this far?
How did we change?
Remind me just who we are
Cause I miss the both of us
Making love the way it was
Miss the both of us
So damn much
How did we change?
How did we change?
