

# Ernest Tubb, Let The World Keep On A Turnin'

Let the world keep on a turnin' let the fire keep on a burnin'  
Let our love keep on a growin' to the sky  
Let our ship of love keep sailin' keep the storm clouds far away and  
Hand in hand we'll walk together side by side

Please don't pay me attention to someone that they should mention  
That they saw me in the arms of Mary Jane  
Oh it's plain they're only jealous and their hearts are filled with malice  
Their intention is to only bring us pain  
Let the world keep on a turnin'...  
[ steel ]  
When they try to cause us trouble we'll politely pop their bubble  
By ignoring any gossip they might start  
So let the north wind keep a blowin' we'll be safe cause we'll be a knowin'  
That our love is safely locked inside our hearts  
Let the world keep on a turnin'...  
Hand in hand we'll walk together side by side
