

Escape The Fate, The Structure Falls

Save the scars
Hide your face
I've done
Read your mind
Well, my perception on deception
And this will to lie is changing

It's ripping me and tempting me
To give you this gun
But all the time that you have lied
I've known what you done

So save the scars and hide your face
Keep your form and keep your pace
Don't lose control, don't leave my side
You've earned your wings and you will never die

The structure falls
They circle our foundation
As the soil cracks
And everything is burning down

These enemies have breeched
The line with swords in hand
Held to the sky

Heal these wounds
Find a place to rest
Concentrate on the call
(Hello)
Our fathers on the other end
Well, my perception on deception
And this will to lie is changing

It's ripping me and tempting me
To give you this gun
But all the time that you have lied
I've known what you done

Hide your face
I've done
Read your mind
Well, my perception on deception
And this will to lie is changing

It's ripping me and tempting me
To give you this gun
But all the time that you have lied
I've known what you done

So save the scars and hide your face
Keep your form and keep your pace
Don't lose control, don't leave my side
You've earned your wings and you will never die

The structure falls
They circle our foundation
As the soil cracks
And everything is burning down

A liar that blinded my eyes
Covered them with ribbons
I know a liar a that blinded my eyes
But my flesh always gives in
