

Esmee Denters, Figure It Out

18 years old
I'm supposed to know what I want
So much pressure at once
Finally adult, what I've been waiting for
But I don't know what I want or where I wanna go
Who I wanna be, what I wanna do with my life
So many questions all at the same time like

What's the reason that I'm here for, what's life about
Maybe when I get older I'll figure it out, figure it out
You can call me lost if you like
You can tell me girl that is life
Cuz what's wrong can't be right through someone else's eyes
But I gotta make the choice on my own, now that I am grown
Gotta move out of the childhood zone
