Eurythmics, Take Your Pain Away

If I could find a way To soothe your troubled mind Then I would erase your fears And help you to unwind. I would ease the burden That you carry everyday. Oh - don't you know I'd find a cure And take your pain away.

Take your pain away Take your pain away...

And even though you're far from here Don't forget I'm always near. Find comfort in these words I send In this cold world.

Take your pain away Take your pain away...

For every aching heart For every broken soul...

So give up your worries They'll only do you harm. There is no need to be concerned It's just a false alarm.

(Chorus repeats...)
