Eve 6, Without You Here

I quit looking at the clock It'll only bring me down And it won't bring you here

If I pulled out all the stops And a little less of my hair Could I bring you here is my Favorite white Bic light, It can Undarken the night, keep it With you close as I wave your east bound plane away.

Too scared to play my eyes are too dilated to see Without you here, I feel my fear

Too scared to play my eyes are too dilated to see Without you here, I feel my fear

Without you here, I feel my fear (woah)

I don't want to rock
I want
Roll on top
Of you and not let
Go with me to 2nd street & Dance
Cause we tear up the place
I miss your pretty face

Too scared to play my eyes are too dilated to see Without you here, I feel my fear

Too scared to play my eyes are too dilated to see Without you here, I feel my fear

Without you here, I feel my fear Without you here, I feel my fear Without you here, I feel my fear (YEA!)
