

Even No Fear, Conspiracie

I can't see the shape of a nation
Tell me where's going our passion
I don't think it can be the solution
What we need is motivation

I can't breathe, can't live in the section
Because of these, they don't permit relations
I can't admit the non-creation
They failed their mission

I want and I try
To keep my nation fair all the time
The things that they try to hide
We will soon know them
And we will fight against

They don't offer me any protection
Their expects are over dimensioned
They just don't let us any option
Come on, stand up against their vision

They won't be able to give any reason
For what they did, for all the destructions
They said it was kind of a solution
They failed their mission

I want and I try
To keep my nation fair all the time
The things that they try to hide
We will soon know them
And we will fight against
