

Evens, All These Governors

(Generally I don't speak ill of the dead however I might make an exception in this case)

When things should work but don't work
when things should work
when things should work but don't work
when things should
when things should work but don't work that's the work of all these governors
interference by decree that's the work of all these governors
they block they block they block that's the work of all these governors
when things should work but don't work that's the work of all these governors
he pulls it up the air with your information panels that form the southern combination
shut up shut up shut up shut up shut up shut up
anually review and a cup on every corner hand out rewards for snitching on a former
shut up shut up shut up shut up

when things should work but don't work that's the work of all these governors
when things should work but don't work that's the work of all these governors
they're always looking after me
that's the work of all these governors
they walk but never for the distance
that's the work of all these governors
when things should work but don't work that's the work of all these governors
that's the work of all these governors
while we're down on all fours let's scratch their names into the floor
so we won't wait we won't wait for all these governors
so we won't wait we won't wait for all these governors
so we won't wait we can't wait for all you governors
