

# Every Time I Die, Bored Stiff

I was wrong, close one

I am wrong

I said it

I was wrong, I mean it

Did it stick? Come down from there

I know it's hard to swallow, when your head is overturned

Hey there girls, I'm a cunt

There was venom in the heart of the dagger

They found a worm in your pearls saying prayers

All is finally infested, unless we blossomed in the in the cankerous air

Then only hell can help us

I got off, just once, you were right

I admit it

We weren't soft, just better

Do you flinch? Keep that radio dry, I'm sorry you were all mine

Let the boys find your body

Let love gnaw the meat from your bones

Admit the arrows, suffer the hot flash

We come together now

All together now
