

Expatriate, Only Wanna Love Ya

In the cracks, in the cracks is where you'll go
I'll find you in the dark with a head full of snow
And downtown with the big dark eyes
You opened up your heart to a big black sky
Black sky

You'll be my friend, right to the end
Take it down hard over the highs
And just like before, you'll come through the door
And take it and take it
Come and take it some more

I never meant to hurt ya
I only wanna love ya
I only want to love you
Only wanna love ya
Love ya

I want some cocaine and dirty water
Take it down in the dark tonight
I want some cocaine and dirty water
I'm gonna scream in the dark tonight

I never meant to hurt ya
I only wanna love ya
I only want to love you
Only wanna love ya

I never meant to hurt ya
I only wanna love ya
I only wanna love ya
Only wanna love ya

Walking through the city at night
You take a left and I take a right
Walking in the city at ni-i-ight
Walking through the city at night
