## Face To Face, Fight Or Flight

We're ready to go
Ticking like a bomb that's about to blow
It's taking control
Pulling at your feet like an undertow
You don't really know
If you're all that capable
But you've been told

Figure it out Don't pretend you're stupid Sort it out Go make yourself useful

You're better than dead You really made a mess with the words you said So easily fed The flames of the fire rise above your head They want to be led You've joined the ranks instead There's a voice in your head

I can't figure it out
Any more than the generation before me
I can't figure it out
How we got where we are today
I can't figure it out
Any more than the generation before me
I can't figure it out
We've got to fight not to fade away
