

Falling Up, Fearless (250 And Dark Stars)

Empty house far away
Lost in lonely space
You know you've felt the same
From the shallows in love
To the depths of your scars
You know you want to change

In the rafters a vate
Fixed and spinning late
There is a certain fear
Even light with control
Lights outside our homes
Wait for every tear

So exit the fall
And now it's over
You're learning it's all
Before your heart

I found a way out
Through everything I've known
I'm walking fearless
With my faith down
And all that I own
Don't take my picture
'Cause I won't be
There standing alone
I'm living fearless
So fearless
Like every day's my own

Steady hands in the planes
Calculated ways
To call it alien
Figure hearts far away
When you work so late
From a distant end

So exit the fall
And now it's over
You're learning it's all
Before your heart

So exit the fall
And now it's over
You're learning it's all
Before your heart

Call it what you want
Call it just a game
Call it insane
All of these voices

Look everybody close your eyes
Travel into the place in the back of your mind
It's a place you'll never reside
All the thoughts combined
See places and thousands of faces all at the same time
