

# Fame Factory, Pop Into My Heart - Fame

I didn't even know you  
Before you had a grip around my heart  
You didn't need to show me  
No more then just a little who you are

I try to keep a distance  
But no one's never ever been so close

How could I handle the way that I feel?  
The impression you make me some real

REF:

You pop into my heart  
It's just the way you are  
You keep on teasing me  
And then you pleasing me  
And I never want to go  
No matter what you do  
It's always me and you  
You pop into my heart  
You dilate from the star  
No matter what I say  
Your always gonna stay  
Cause I...I Can't stop loving you (No, I don't)

You look a little puzzled  
When I can figure out the way you are  
Don't even have to tell me  
Cause everything is coming from your heart

It's something about you baby  
Just always makes me keep you on my mind

You are the closest to heaven I get  
And I haven't seen half of it yet

REF:

When you do  
All the things I've never seen  
Teasing me, pleasing me  
You make me love you  
I don't need everything  
You are just continuous like you are  
Your love, has moved into my heart

I never want to go  
No matter what you do  
It's always me and you
