

FAULHABER , Savannah (ft. Jake Reese)

In your deep blue eyes
I see clear blue skies
When I think of you
I wanna go back
Under purple light
We stayed up all night
And we promised then, that we'd

Hold on to every word that we said
Replay every moment inside of our head

Savannah, I met you in the summer
I love your endless colours
I'll always be your lover
Together we got faded
Still high on love, I taste it
Got in the pool butt naked
Where magic was created
I met you in the summer

I met you in the summer

When the heat is on
And we're up till dawn
And you're by my side
To kill the lonely nights
Just skin on skin
Under a thousand stars
And we promised there, that we'd

Hold on to every word that we said
Replay every moment inside of our head

Savannah, I met you in the summer
I love your endless colours
I'll always be your lover
Together we got faded
Still high on love, I taste it
Got in the pool butt naked
Where magic was created
I met you in the summer

I met you in the summer

Savannah, I met you in the summer
I love your endless colours
I'll always be your lover
Together we got faded
Still high on love, I taste it
Got in the pool butt naked
Where magic was created
I met you in the summer

I met you in the summer
