

# Fear Factory, Archetype

You must never forget  
The essence of your spark  
All of that which defines you  
Is the essence of your blood

The infection has been removed  
The soul of this machine has improved [x2]

Look into my eyes  
And tell me what you see  
Someone real  
This is real  
What you wish to be

You must never forget  
To modernize performance  
Malignancies on the system  
Will handicap slow up and rust

The infection has been removed  
The soul of this machine has improved [x2]

Look into my eyes  
And tell me what you see  
Someone real  
This is real  
What you wish to be

Fuck!

Can you see  
Can you see

Look into my eyes  
And tell me what you see  
Someone real  
This is real  
What you wish to be

Open your eyes (open your eyes, open your eyes) [x7]
