

# Fear Factory, Contagion Empire

A man held hostage by this contagion  
Alone, abandoned, in search of legion  
Under pressure, under black skies  
We must find the cure, before we die

I can see the bullets rip inside the crossfire  
My suicide run through the razor wire

All must endure  
We will not live forever  
All must endure  
We will not live forever

Terror awaits me at every turn  
Honour is stronger, we fight all at once  
Hate spreads like wildfire in foreign lands  
Incurable pain is this gun in my hand

All must endure  
We will not live forever  
All must endure  
We will not live forever

Who wants to live...  
Who wants to live forever?

All must endure  
We will not live forever  
All must endure  
We will not live forever

All must endure  
For the mercy of one  
All must endure  
For the mercy of one  
Mercy of one  
Mercy of one  
Mercy of one
