

Feeder, Guided By A Voice

I don't want to get drunk, forget about the memories
I just want to heal that aching inside
I just can't be lonely, guided by a voice
I just won't be broken, knowing that I have a choice

Maybe it's time to make you feel that you still belong
maybe it's time to set things free

It's our time, so think about it
I know you want it too
it's our time, so think about it
can't live without it, I dream about us now

Sentimental values
water under the bridge
voices of a nation echo in my head
I just can't be lonely, guided by a voice
I just won't be broken, knowing that I have a choice

Maybe it's time to make you feel that you still belong
maybe it's time to set things free

It's our time, so think about it
I know you want it too
it's our time, so think about it
can't live without it, I dream about us now

I just can't wait, can't keep this silent
I just can't wait, can't keep this silent

I just can't be lonely, guided by a voice
but I just won't be broken

It's our time, so think about it
I know you want it too
It's our time, so think about it
can't live without it, I dream about us now

I dream about us now

I just can't wait, can't keep this silent
