

Filthy Relics, Hate

Loggers cutting down trees
Pollution out of factories
Ebola and killer bees
Makes me wanna get down on my knees
We hate everything we love
We love everything we hate
All the people had a chance,
but no one ever wins.
AIDS and Hepatitis B
Dump all your waste in the sea
No space to live for you and me
Let's go do some LSD
We hate everything we love
We destroy everything we love
Soon the gate will close
This place will be our home
All our lawyers working hard
To get our criminals off the charge
We need this and we need that
I wanna hit you upside the head with
a baseball bat
baseball bat
baseball hat
Progress sucks, this crap ain't real
I wanna change, the damn reel, but
we can't, it's too late to undo all this
stupid hate
