

Finding Westerly, Hope You Stay

Now i wont lie
This feeling for the first time
Everytime i see your face i know thats all i need
Now i wont lie

Everyone has gone, and somehow your the only one thats come along
Like a star thats been lost in the big dark sky at night
I found you and your here, ill never let you go

Everytime you say goodnight i hope its not the last
In your eyes i know thats why ill make this last

No one seems to know, how quickly people always seem to come and go
So when you grab that star that has been missing from your sky
Hold onto it so dear, and never let it go

Everytime you say goodnight i hope its not the last
In your eyes i know thats why ill make this last

Now i wont lie
This feeling for the first time
Everytime i see your face i know thats all i need
Now i wont lie

Everytime you say goodnight i hope its not the last
In your eyes i know thats why ill make this last

I hope you stay, I hope you stay
