

# Finger Eleven, Good Times

Something has stuck in  
Underneath my skin  
Eyes all looking in  
For something within  
Somewhere in here

Now everything I say  
Gives this all away  
Senses deadened again  
Nothing lives today  
Not in here

Here in your head

Careful what you're feeling  
On the inside  
You should try to remember  
The good times and the high life  
Are you feeling alright?

Felt that I belonged  
And now I feel that gone  
Where it all went wrong  
I traced it all along  
Back here again

There was something calling me  
To negativity  
Dark covering me  
Shrouding every scene  
I'm cast in

Careful what you're feeling  
On the inside  
You should try to remember  
The good times and the high life  
Are you feeling alright?

Careful when you're feeling  
Out of your mind  
You should try to remember  
The strong lines in the spotlight  
Till you're feeling alright

Please answer  
I'm calling just to find out  
If you could be here  
For me when I crack  
The answer came  
I found it buried in  
The trash there  
I saw it stare

Careful what you're feeling  
On the inside  
You should try to remember  
The good times and the high life  
Are you feeling alright?

Careful when you're feeling  
Out of your mind  
You should try to remember  
The strong lines in the spotlight  
Till you're feeling alright
